

22, 1992, and amendments to the Constitution and Convention, signed at Kyoto on October 14, 1994, together with declarations and reservations by the United States as contained in the Final Acts. I transmit also, for the information of the Senate, the report of the Department of State with respect to the Constitution and Convention and the amendments thereto.

The 1992 Constitution and Convention replace the ITU Convention signed in Nairobi in 1982. Prior to the 1992 Constitution and Convention, the ITU Convention had been routinely replaced at successive Plenipotentiary Conferences every 5 to 10 years. The 1992 Constitution and Convention represent the first basic instruments of the ITU intended to be permanent. Basic provisions on the organization and structure of the ITU and fundamental substantive rules governing international telecommunications matters are embodied in the Constitution. The ITU Convention is comprised of provisions on the functioning of the ITU and its constituent parts.

The 1992 Constitution and Convention reflect the effort by ITU Member countries to restructure the ITU to make it more effective in responding to the changes taking place in telecommunications. The United States is pleased with the restructuring of the ITU. The changes adopted are expected to enable the ITU to meet challenges brought on by the dynamic telecommunications environment.

The 1994 ITU Plenipotentiary Conference was convened less than 4 months after the entry

into force of the Constitution and Convention to amend the 1992 Constitution and Convention. Recognizing that more time should be allowed to evaluate the extensive changes to the structure of the ITU, the Conference adopted only a few minor amendments, which were acceptable to the United States.

In signing the 1992 Constitution and Convention and the 1994 amendments, the United States made certain declarations and reservations. The specific declarations and reservations are discussed in the report of the Department of State.

The 1992 Constitution and Convention entered into force July 1, 1994, for states which, by that date, had notified the Secretary General of the ITU of their approval thereof and, in the same manner, the amendments to the Constitution and Convention entered into force on January 1, 1996.

Subject to the U.S. declarations and reservations mentioned above, I believe the United States should be a party to the ITU Constitution and Convention, as amended. They will improve the efficiency of management of the ITU and will allow it to be more responsive to the needs of the United States Government and private sector. It is my hope that the Senate will take early action on this matter and give its advice and consent to ratification.

WILLIAM J. CLINTON

The White House,
September 13, 1996.

The President's Radio Address *September 14, 1996*

Good morning. Today I know the thoughts and prayers of every American are with our men and women in uniform serving in the Persian Gulf, standing up for America's interests. I want to speak with you about why 10 days ago I ordered our Armed Forces to strike Iraq, what we have accomplished, and where we go from here.

America's vital interests in the Persian Gulf are constant and clear: to help protect our friends in the region against aggression, to work with others in the fight against terrorism, to

preserve the free flow of oil, and to build support for a comprehensive Middle East peace. Any group or nation that threatens the stability of the region threatens those interests.

For the past 5 years, Saddam Hussein has repeatedly threatened the stability of the Persian Gulf and our allies Saudi Arabia and Kuwait. Time and again, he has lashed out recklessly against his neighbors and against his own people. America's policy has been to contain Saddam, to reduce the threat he poses to the region, and to do it in a way that makes him

pay a price when he acts recklessly. That is why when Saddam sent his troops into the Kurdish city of Irbil in northern Iraq 2 weeks ago, we responded strongly, immediately, and strategically.

If we had failed to answer Saddam's provocation, he would have been emboldened to act even more recklessly and in a manner more dangerous to our interests. That is why we did respond and why we did so in a way that made our interests more secure. We acted in southern Iraq, where our interests are the most vital and where we had the capacity to increase the international community's ability to deter aggression by Saddam against his neighbors.

I ordered the attacks in order to extend the no-fly zone in Iraq, the air space through which Iraq's military is not allowed to fly. Now we control the skies over Iraq from the border of Kuwait to the southern suburbs of Baghdad. This action tightened the strategic straitjacket on Saddam, making it harder for him to threaten Saudi Arabia and Kuwait and easier for us to stop him if he does. In so doing, we advanced America's fundamental interests in the region.

Of course, our interests also must include protecting the safety of our own pilots who are patrolling the expanded no-fly zone. That is why our cruise missiles struck the bulk of Saddam's air defense system in southern Iraq. The United States will take whatever steps are necessary to protect our pilots as they enforce the expanded no-fly zone and to defend our strategic interests. I have ordered sufficient forces to the region to give us that capability.

On another note, let me say that I deeply regret the very week our Armed Forces advanced America's interests halfway around the world, here at home, the Senate missed an historic opportunity to make our soldiers and citi-

zens safer by failing to vote on the Chemical Weapons Convention. The fact that our troops are facing off against Saddam Hussein, who once amassed stockpiles of chemical weapons and still seeks to develop them, should have underscored the importance of this treaty. But the treaty seems to have gotten caught up in election-year politicking.

It's been nearly 4 years since the Bush administration signed the Chemical Weapons Convention and 3 years since I submitted it to the Congress. We've been at this a long time, and I have no intention of letting this treaty die. Our military supports it; leaders of our Nation's foreign policy, both Democrats and Republicans, including President Bush, General Colin Powell, and Senator Dick Lugar, support it.

We all agree that we should be sending a strong message as a united country that America will do its part to banish poison gas from the Earth. And meanwhile, we must do everything we can to protect our soldiers and to keep such weapons out of the hands of terrorists. The Chemical Weapons Convention will clearly help us to do that.

So I want the American people to know that I will work with the Senate to pass the Chemical Weapons Convention when a calmer political climate prevails. We cannot afford to play partisan politics with America's security. Our troops who are doing such an outstanding job in the Gulf and all around the world and all the American people deserve better than that.

Thanks for listening.

NOTE: The address was recorded at 9:25 p.m. on September 13 in the Map Room at the White House for broadcast at 10:06 a.m. on September 14.

Remarks in a Roundtable Discussion on Hurricane Fran in Raleigh, North Carolina *September 14, 1996*

The President. Thank you, Governor. I don't want to say too much right now. We mostly just came down to listen and to see what we could do to help. But I would like to say, first of all, that like most Americans, I've followed

the course of the hurricane and the storms and the rains. I have followed very closely. I did see the video on the way down of the—specifically focusing on your damage along the beach, but I also have watched over the last several
